

Your business relies on a robust IT infrastructure in the modern, fast-paced digital world. By transitioning to a more agile, scalable, and cost-effective platform like Azure VMware Solution (AVS), you can propel your business forward and reduce operational complexities while enhancing performance.

Efficiently Transition to Azure VMware Solution with Minimal Disruptions

IXceloCloud's Multi-Vendor Support Solution, MVSS365, includes an AVS Migration Service that helps you seamlessly migrate your current VMware environments to AVS, ensuring a smooth transition with minimal business disruption. We understand the complexities of today's dynamic business landscape and offer a balanced approach that ensures both technical excellence and true stakeholder involvement.

MVSS365 allows you to choose the amount of help you need, whether it's discovery to get you started or end-to-end execution.

Option 1:

Discovery & Assessment

Get a customized independent assessment and execution plan for your unique needs. We assess migration readiness, provide technical insights, and identify VMware workloads. We streamline migration by evaluating compatibility with AVS and advising on necessary refactoring.

Option 2:

Deployment, Migration & Optimization

Our AVS specialists perform Option 1 tasks, plus end-to-end migration services, including Azure subscription setup, AVS node configuration, network integration, VMware tooling use, workload migration, testing, cost optimization, governance establishment, and application modernization guidance.

Benefits

With MVSS365 leading your migration efforts, you can:

- **Leverage the insights of an impartial 3rd-party advisor** uniquely positioned to recommend the optimal technological solutions tailored to your needs.
- **Tap into the expertise of our highly skilled engineers** and subject matter experts to bolster your deployment.
- **Access comprehensive end-to-end support** from a trusted provider wholly committed to the success of your deployment.
- **Expedite your technology migration journey** and achieve accelerated business outcomes.
- **Extract the greatest value from your IT investment** with tailored solutions and strategic guidance.

Take the Next Step Toward a Future-Proof Infrastructure
